

MEASURING INNOVATION RESULTS? THESE TOOLS MIGHT HELP

INNOVATION HISTORY

The 'innovation history' is designed to record the reflections of people that have taken part in an innovation process. This is to achieve better results in the future and to allow external parties to learn, either by studying an individual case or by comparing experiences across several cases.

Learn more [here!](#)

EVIDENCING INNOVATION

When developing and implementing a new solution for social good, projects require evidencing to garner recognition and help scale the innovation. That is why Response Innovation Lab has created a Monitoring & Evaluation toolkit for evidencing a humanitarian innovation.

Access the toolkit [here!](#)

EVALUATING GLOBAL INNOVATION

The challenge of 'doing development differently' is an ongoing global discussion. TripleLine explored Approaches, Lessons and Reflections towards Evaluating Innovative Solutions to Global Challenges.

Explore TripleLine findings [here!](#)

DEVELOPMENTAL EVALUATION & generaTOR

You can use the [Developmental Evaluation Study](#) to evaluate innovative programs that operate in complex environments and are thus expected to adapt over time; and you can also use innovative MEL tools such as the [generaTOR](#) for a smoother evaluator recruitment experience.
